

YOU LEAD THE WAY

MISSION: LIFELINE

PROVIDING CARE. RESTORING CALM. GIVING HOPE.

When heart attack victims call for help, they really want a hero. It's time everybody knows: the hero is you.

By putting the American Heart Association evidence-based guidelines to work for your heart attack patients, you lead the way in the battle for their survival. Thank you for being on the team!

Seconds count when a patient suffers a STEMI heart attack—the most deadly type. The agencies recognized here have implemented the American Heart Association's systems-of care guidelines in treating these time-sensitive patients.

**Data used for award status is based on self-reported data.*

The EMS agencies recognized here have achieved 75% or higher on the criteria below that are applicable to their systems:*

- Patients with non-traumatic chest pain \geq 35 years, treated and transported by EMS who receive a pre-hospital 12-lead electrocardiogram
- STEMI patients transported directly to a STEMI receiving center with pre-hospital first medical contact-to-device time \leq 90 minutes
- Lytic-eligible patients transported to a STEMI referring center with a door-to-needle time in \leq 30 minutes
