Disposal Fee For Additional Garbage is .03 per lb.

**Open Tuesday thru Saturday
7:00 am to 3:00 pm**

You can help make recycling work for everyone!

Like many other Americans, you collect and sort items that can help your community reduce the amount of garbage going to the landfill. Today, approximately 21% of our trash is recovered annually by recycling. Manufacturers use them to make new products. We need your support for recycling to remain part of the solution to the country's garbage issue.

Why Recycle?

**Conserves Natural Resources*

Raw materials are used to make nearly every consumer product we buy. Iron, tin and aluminum are mined to make metal cans. Trees are cut to make paper and cardboard. Petroleum is used to make most plastic products. If these products are recycled, fewer natural resources are needed (most important for those resources that are non-renewable).

**Save energy*

Recycling is energy efficient. For example, it takes 95% less energy to melt and reform aluminum cans than to make cans from raw ore.

**Reduces waste, saves landfill space*

More than half of Kentucky's landfills will close due to new regulations and lack of space.

Shelby County

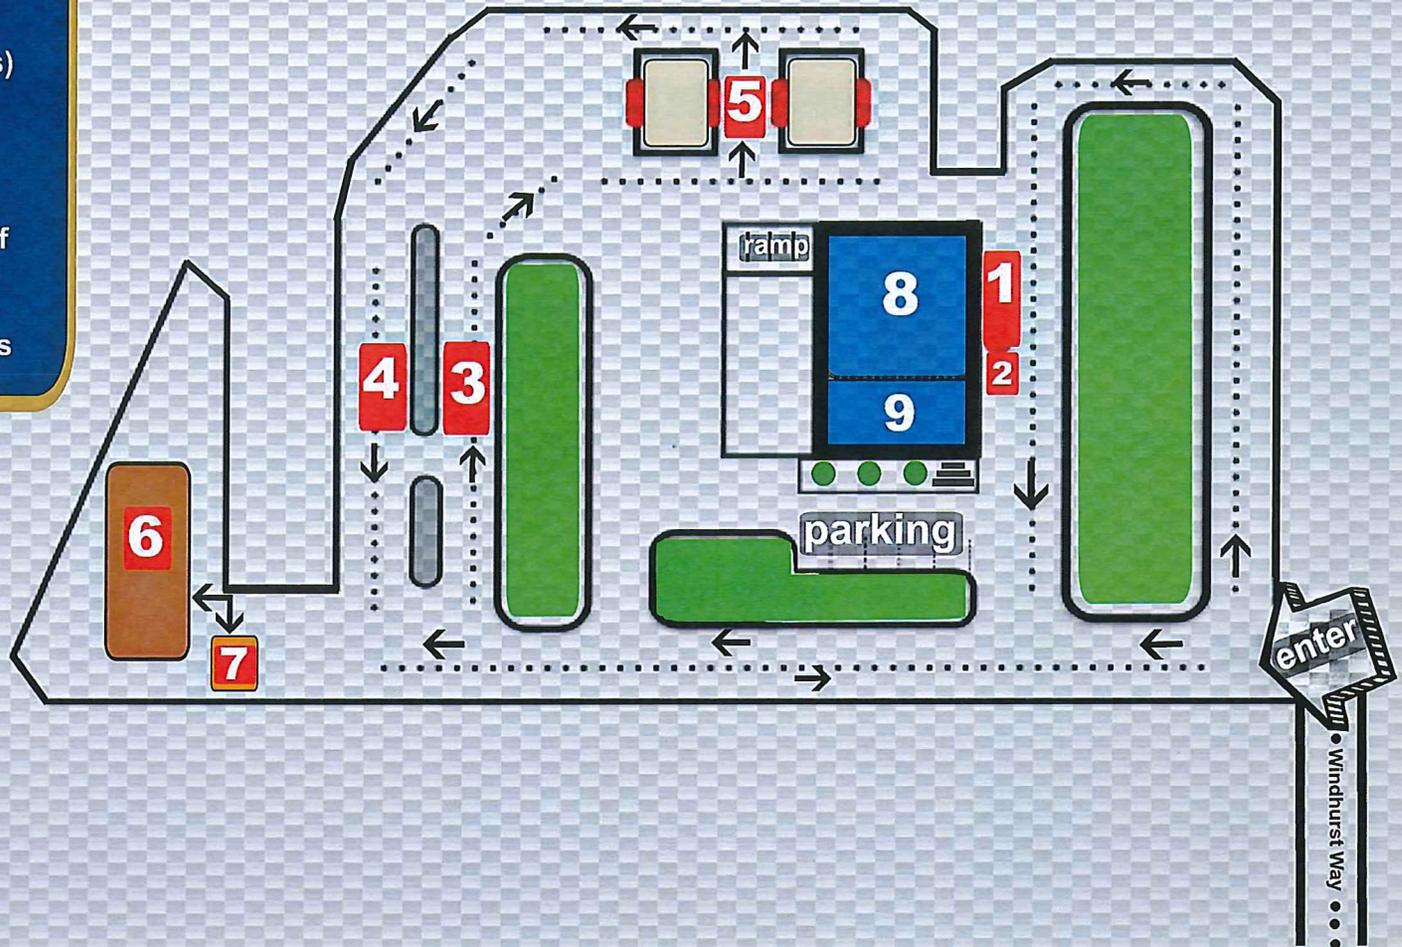

Recycling Facility

**170 Windhurst Way
Shelbyville, KY 40065
(502)-633-2699**
